

# IN-APP MESSAGING SDK VERSION 2.1.2 - Android

In-App Messaging SDK v2.1.2 for Android contains the following bug fixes:

## 1. Custom ttr\_duration Does Not Work

### Symptom:

Once the host application changes the ttr\_duration field as part of the branding configurations, the SDK supposed to show an android snackbar for that same time, but it was always for 3 seconds.

**Fix:** We added a code to consider the field from the host application

## 2. Plurals lp\_ttr\_message\_minutes & lp\_ttr\_message\_hours Do Not Work

**Symptom:** When an agent change his response time, the SDK supposed to show an android snackbar with the relevant message: “An agent will respond within the next XXX minutes / hours / days”, but it showed only “An agent will respond within”

**Fix:** We added a code to consider the field from the host application, and a comment to be careful not to override the “%1\$s” part in the field lp\_ttr\_message\_with\_timestamp
